## Redcliff Footballers Win Inter-City Game

Defeat Picked Team in Hat last Saturday.

Last Saturday Redcliff footballers added another scalp to their belts when a team picked from the two clubs here defeated a picked team from the Medicine Hat clubs in a friendly inter-city game. The score was 1-0 for Redcliff.

So evenly were the two teams matched that until the second period was well advanced it looked as though it would be a scoreless game. When the period was about half way through, however, Redcliff forwards forced a corner and as well as the corner kick placed that J. Davies had little difficulty heading the ball into the net.

Redcliff forwards had the edge on the Hat but the Hat defence saved on several occasions. The Redcliff defence also did good work as the result of the game will show.

The following was the line-up: Redcliff—Fairhurst; T. Davis, Geo. Davis, J. Bell, W. Gibson, W. Willis, Alf. Dutton, J. Davis, J. Kilner, D. Phillips, T. Wainwright. Med. Hat—MacDonald, Goldie, Marshall, Parr, McDonald, McCally, Charles, Appleton, Williams, Juna, Matchett.

Referee—Hugh Goldie.

## War Film for Women At Cameo Monday

To call "Roses of Picardy" a war film without qualification would be to cause a misconception. As "Mademoiselle from Armentiers" dealt with the lighter side of the war, the irresponsible humour of the Tommies, so "Roses of Picardy" presents a psychological study of a few individuals and shows their reaction to the great world event. The film strikes a new note. There are thrilling battle scenes the demolition of a village by gunfire, and behind it all the age old truth that while man gives blood and life in war the anguish is woman's.

This is undoubtedly Maurice Elvey's greatest picture. The film will go to the hearts of everybody in a way that no other has done and the climax will send few away with dry eyes. This picture and a good comedy will be shown at the Cameo next Monday evening.

## Conservative Rally At Medicine Hat

Will be Held in 'Twails' Hall—Redcliff People Invited.

Arrangements have been made for a big Conservative rally to be held in 'twails' hall, Medicine Hat on Friday evening of this week at 8 o'clock.

C. S. Blanchard, Conservative candidate for this constituency will be present to address the meeting. It is also expected that D. M. Duggan, Conservative leader for the province will be present.

Besides addresses there will be a musical program. A special invitation is extended to citizens of Redcliff to attend.

During the past week Dick Phillips sold residential property on fourth street to R. Anderson.

## "WISE OLD CAT"

In its issue of last Tuesday the Medicine Hat News "Office Cat" says: "Trying to fool others is a good way to fool yourself." Evidently the old office cat has been glancing over the rest of the page on which he is located.

## TEMPUS OMNIA REVELAT

How times change. A few short years ago Liberal politicians and newspapers were pleased to criticize and condemn what they termed the "flag waving Policy" of the conservative party. Last Monday the Medicine Hat News says editorially: "The McKenzie King administration has certainly supplied another substantial guy-wire to strength on the staff from which the flag of Empire floats over Canada."

Wow! Flaggwaving? Nonsense! That's just the News' way of reminding its readers that the first leader of the conservative party in Canada once said: "A British subject I was born and a British subject I will die."

Liberal papers are putting on a new dress for this election and all they have to do is just turn the old one inside out. In the words of the heading of this article. "Time uncovers all things."

## Political Meeting Here Thursday Night

Hector Lang, and J. W. McDonald to Address the Meeting.

Bills are out announcing a political meeting to be held in the cliff hall here on Thursday evening of this week at 7:30. The meeting is called in the interests of Mr. Hector Lang, Liberal Candidate in this constituency for the legislature.

Mr. Lang will be accompanied by J. W. McDonald, K. C. Liberal leader for the province and both will address the meeting.

Chas Zeigler is at present in the hospital suffering from an attack of bronchitis.

## Officials Visit The Airplane Plant Here

Are Well Pleased with the Building and Grounds.

Directors of the Dominion Air Industries Limited, which Company has established an airplane factory in Redcliff, were in town last week inspecting the plant.

The officers expressed themselves as well pleased with the building and grounds and with the progress which has been made in getting the plant equipped. They expect within the next few weeks to have considerable new machinery installed and it is their intention to get the plant under way as soon as possible.

Last Monday Melvin Rindahl received word that his wife was seriously ill at the sanitarium in Calgary. Mrs. Rindahl has been confined to this institution for the last few years. Mr. Rindahl and his family left at once for Calgary. As no word has been received it is presumed that Mrs. Rindahl is rallying.

Advertise in the Review.

## Council Has Quiet Session Last Monday

Still Receiving Offers for houses and Lots.

With the exception of a few applications for town lots and buildings nothing of any importance took place at the regular meeting of the town council held last Monday evening.

Accounts from the Dept. of Neglected Children and from the provincial training school for \$75 and \$15 respectively, were ordered paid and the sum of \$450 was authorized to be transferred to the School Board.

The offer of A. R. Goodline for lot 1 Block 5 Plan 1117V for current taxes was approved.

The offer of \$100 from E. Black for building and lot in Lockwood was accepted.

The offer of Wm. Smith for building on lot 38 block 7 was not accepted and price of \$50 was placed on this building.

Mr. Mathony was authorized to have roof on his building repaired and the expense for same be applied on rent.

## FOOTBALL HERE TO-NIGHT

### Football Schedule For June

League	Tuesday, May 27th	League
Redcliff vs Brick & coal	Thursday May 29	League
Redcliff vs Callies	Tuesday, June 3rd	Five Roses
Brick & Coal vs Legion	Wednesday June 4	Five Roses
Callies vs Brick & Coal	Friday June 6	League
Legion vs Callies	Tuesday June 10	Five Roses
Brick & Coal vs Redcliff	Wednesday June 11	Five Roses
Inter-City (for Assoc. fund)	Friday June 13	Fraternity
Legion vs Redcliff	Tuesday June 17	League
Brick & Coal vs Callies	Wednesday June 18	League
Callies vs Legion	Friday June 20	Five Roses
Legion vs Redcliff	Tuesday June 24	Five Roses
Redcliff vs Brick & Coal	Thursday June 26	League

All games played on grounds of first mentioned team.

For the evening of July 1st, it is hoped that arrangements will be completed with the Redcliff Stampede Committee, and the clubs, for the return inter-city game to be played at Redcliff.

The Bennett Shield series will be arranged for on the completion of the first half of the schedule; and the second half of the schedule for the League and Five Roses Cup competition will be published as soon as the above games are finished.

## Play By Local Talent Was Great Success

Showed That Those Taking Part Have Excellent Talent.

Owing to the illness of the editor who was confined to his home all last week we were, unable to give an account of the play "The Young Village Doctor" which was put on in the Cameo theatre Tuesday evening under the auspices of Vega Rebekah Lodge.

Despite the other attractions the hall was well filled for the occasion and all present thoroughly enjoyed the evening's program.

The play was well put on, showing that those who took part have considerable talent for performing on the stage. Thoroughly enjoyed the audience and brought forth merited applause.

Although the postponing of this event from the original date owing to sickness, was a slight handicap, still it was a great success from every standpoint and the committee was able to report proceeds amounting to slightly over \$90.

Alf. Dutton is able to get out around again after being laid up with scarlet fever.

Rev. L. M. Zeigler and D. Miller motored to Arrowwood last week end, and Miss Miller returned with them. While in Arrowwood Mr. Zeigler consulted with Brethren officials who were anxious that he continue as pastor of their church here.

## Churches

ST. MARY'S CHURCH  
Celebration of Mass second and fourth Sunday of each month at 8:30 a. m.

GORDON MEMORIAL UNITED CHURCH  
Rev. W. B. Smith, Pastor  
Sunday June 1st 1930  
10 a. m. Church School.  
Missionary Programme and offering.  
11:15 Morning worship.  
Childrens Monthly Service.  
7:30 Evening worship  
Subject: "What Pentecost means to the Church and the World."

ST. AMBROSE CHURCH  
Rev. Malcolm Stewart, Vicar.  
Sunday June 1st 1930  
Sunday after Ascension.  
10:00 A. M. Sunday School.  
11:00 A. M. Choral Eucharist.  
7:30 P. M. Evensong  
There will be a general meeting of the congregation of St. Ambrose Church in the Parish Hall on Thursday, June 6th, at 8:00 P. M. for the purpose of filling the vacancies in the vestry and transacting such other Church business as may arise.

CHURCH OF BRETHREN  
Rev. Ira M. Zeigler, Pastor  
Services every Sunday.  
Sunday School 10:30 a. m.  
Morning service 11:30  
Evening service at 8:00.  
Choir practice every Thursday evening at 7:30.  
Everybody welcome. A special invitation is extended to those who have no church home or do not attend any Sunday School.

## Brick & Coal Lose In First League Game

Put up Splendid Fight But Lost Out 2-1

In their League game with the Legion last Tuesday the Brick & Coal team carried no Rabbits foot and as a result they lost out by a score of 2-1 in a game in which, by all accounts, they had much the better of the argument but experienced hard luck in their repeated attempts to locate the nets.

With the wind in their favor the Legion scored two goals in the first half but just before the whistle blew for the end of the period.

The Bricks started the second period with the wind behind them and for the opening fifteen minutes they were very much on the offensive. They stormed the Legion goal time after time forcing several corners, but the Legion defence repeatedly cleared the numerous dangerous attacks. It was a case of hard luck for the Bricks added to clever defensive work by the Legion.

The game was slightly spoiled by the wind but at that it was a good one for the fans.

The teams lined up as follows:  
Redcliff—Thomson; Willis, R. Fairhurst; Lakey, Turner, Y. Lawson; A. Dutton, W. Lawson, Kilner, N. Willis, Sowerby.  
Legion—Hulme, Harvey, Given, Renwick, Gant, McIntire, Appleton, McIvor, Thomson, Matchet.

## Prominent Sheep Man Killed at Suffield

Wm. McLellan Dies from Accidental Discharge of Gun.

William McLellan, age 35 a well known sheep rancher of the Suffield district, accidentally shot himself at his ranch yesterday evening. Mr. McLellan left his home in Suffield in the morning to take a rifle out to his herders nearby. It is presumed he saw coyote on the way and reached for the rifle which accidentally discharged, blowing off the top of his head and killing him instantly.

Coroner Dr. O. Boyd and Sgt. Allan of the A. P. visited the ranch and the coroner decided an inquest was unnecessary.

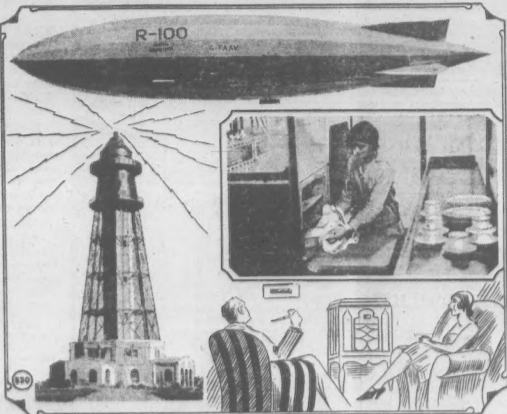

The late Mr. McLellan came to Canada from Scotland as a lad and became interested in sheep. Starting in a small way his flock rapidly grew until at the time of his death he was one of the largest and most successful sheep ranchers of the province.

He was a fine type of young man and was a general favorite among all with whom he came in contact. About two years ago he was married to Miss Spence of Suffield. Besides his wife he leaves two brothers, James and Donald, who recently came out from Scotland and were interested with him in the ranch.

The funeral will take place in Medicine Hat Friday afternoon at 3 o'clock and will be conducted by the Masonic Lodge.

While playing a game of catch ball last Saturday Mrs. R. Conn sprained her ankle. She will be confined to the house for a few days.

## Broadcasting the R-100

When the R-100, Great Britain's huge new dirigible, arrives in the Dominion shortly, there will be no excuse for any Canadian being ignorant of her visit. The news will be broadcast throughout Canada by the Trans-Canada Broadcasting Company from coast to coast over the radio programme transmission system of the Canadian Pacific Railway Company's telegraph.

The arrangements will include a twenty-four hour service on the day of arrival and will be put through stations in Quebec, Montreal, Toronto, London, Winnipeg, Regina, Saskatoon, Edmonton, and

## No other Orange Pekoe can equal this in flavour

'Fresh from the gardens'

### Cause For National Gratification

Profound satisfaction will be felt by the people of Western Canada, in common with the rest of the world, in the successful outcome of the Five Power naval conference in London, England. That satisfaction is all the greater, and the feeling of relief more pronounced, because of the many predictions freely made during the progress of the conference that its results would be nil, and quite abortive in the realization of the hopes in which it was conceived.

Because there were many conflicting viewpoints to be reconciled, many difficulties to be overcome, and the conference ran on month after month, the pessimists told an anxiously awaiting world that nothing would be accomplished because nothing could be; that the nations were still so suspicious of each other that they were afraid to disarm in even the slightest degree; that the old game was still being played with each nation trying to get some advantage at the expense of others.

But with the signing of an agreement by the three great naval powers, and acceptance of a portion of the agreement by the next two naval powers, the dire prognostics of the pessimists have been proved unfounded. Instead, the splendid optimism, the unflinching patience and courage of Ramsay MacDonald have triumphed, and a great forward step taken along the road to permanent world peace.

After a world war lasting more than four years, why should people have become discouraged and foreseen failure because a period of three months was required in discussion of the many knotty problems confronting the naval conference before a solution was found?

The British Commonwealth of Nations, the United States of America, and the Empire of Japan have found themselves whereby they undertake to reduce their naval armaments and expenditure and voluntarily agree restrictions on themselves. The number, size and armament of ships of war is limited. And who, a few short years ago would have imagined it possible, all five powers agree that information will be given to each by all the others of vessels to be built, in replacement of obsolete, abandoned and destroyed ships. This is not preparation for war, but for the maintenance of peace.

But the great achievement of the conference is not to be found so much in the actual reductions decided upon, or the limitations of actions voluntarily assumed, as it is in the established fact that the policy of friendly consultation between nations has been given an impetus which will undoubtedly grow. This more than anything else must all the world with hope for the future.

The conference has also established beyond all possibility of dispute that, no matter how far the leaders of a nation may be prepared to go in the matter of disarmament, they can only proceed so far as public opinion at home will support them in going. The belief is general that the conference would have gone to even greater lengths in disarmament had the various representatives there felt assured of support at home, and that their very willingness to make concessions would not be used to overthrow the whole project when referred for final ratification by their national assemblies.

The great lesson of the conference for all peace-loving people is, therefore, the vital necessity of an awakened and informed public opinion in every land on the world subject of war and preparation for war, rather than preparation for peace. Once again has it been demonstrated by this naval conference that no Government can move very far in advance of public opinion, no matter how laudable may be the motives by which it is inspired or praiseworthy the object sought to be attained.

It is the rank and file, the great mass of the people who must be peace-minded. It is the masses who must be informed and taught to shed their suspicions and animosities. The more ardent advocates of peace the people of all nations become, the more quickly will their recognized leaders and responsible statesmen write those wishes into solemn agreements and binding treaties.

Canadians, perhaps more than any other people in the world, have cause for thankfulness and rejoicing in the reaching of a naval understanding between the British Commonwealth, the United States and Japan. We are part and parcel of the British Commonwealth, while our nearest neighbors are the United States and Japan. With the former we have much in common, while with the latter by reason of our geographical position we must have ever increasing intercourse. Furthermore, any misunderstanding between the United States and Japan could hardly fail to react with injury to us. That all are in accord is cause for deep gratification in Canada.

### Should Finish Studies

#### In Canadian University

#### British Students Who Settle Here Would Find It Helpful

British students who wish to settle in Canada should complete their studies in Canadian universities. This is the conclusion arrived at by Dr. Cyril Norwood, headmaster of Harrow, and chief of the party of headmasters of British public schools who are now touring Canada.

Dr. Norwood has based his conclusions on a study of the Canadian universities the party visited in Quebec and the Maritimes. He hoped the future would see more Canadian students at Oxford, Cambridge and London, but felt the most important requisite for success in Canada was training in a Canadian university. There was a movement to send him to make the University of London the research centre of the empire.

Ireland's foreign trade is increasing.

### Headache

Let Minard's drive it away. Bites the forehead. In the brain, heated.

W. N. U. 1355

### Queen Insects In Peru

#### Certain Type Of Ant Is Used In Surgical Way

There are surgical ant mayflies in Peru. Advice from an expedition to the Field Museum told that when a native of the equatorial forest is wounded, he gets a certain type of ant with powerful fangs. The ant is made to bite several edges of the skin and bring them together. The surgeon loses his life in healing. After he bites his body is snipped off and his head with its death grip on the skin remains till the wound is healed.

Heal the Sprain with Minard's.

### Africa Has Aerial Studio

#### Plane Was Especially Built For Mapping Country

Built especially for the photographing of an area of 50,000 square miles in Northern Rhodesia, an airplane is soon to be put into commission. The machine is literally an aerial photographic studio. It can be down at the height of 20,000 feet and remain at this altitude for seven and one-half hours, while the pilot and photographer map the country below. As most of the flights will be over a wild country the plane has two engines so that if one falls the other will carry the machine to safety.

German scientists have succeeded in obtaining electric current from storm clouds in a Swiss mountain and controlling the sparks produced. Seventy pieces of wood go into the making of a violin.

### Discovery Of Danish Farmers

#### Sale of Milk by the Foot Is a Feat

Milk will shortly be on sale by the foot, following important experiments at a Danish farm.

It has been found that when the natural water is withdrawn from cows' milk the remaining pulp is not only rich in cream, but is similar in appearance to paper.

Special machines have been made to carry out this rolling process on saitary lines, and the milk becomes so highly concentrated that it is a food in itself.

When required in liquid form it is simply dissolved in boiling water and its strength gauged by the amount of water added.

### OWES HER HEALTH

#### TO PINK PILLS

This Weak Anemic Woman Now Rejoices In Health and Strength

It is a scientific fact that nearly all the ills that afflict women are due to poor, thin blood. This is the cause of the loss of spirits and languidness, the poor appetite, breathlessness and aching back that make life so dreary for so many women. But suffering women can banish all these miseries by taking Dr. Williams' Pink Pills, for it is a known fact that these pills create an abundance of new rich blood. In their wonderful reputation is based on the fact that proof of these statements is given by Mrs. Deane, La Tuque, Que., who says: "Before I took Dr. Williams' Pink Pills I was in a bad way run down condition. I appeared to be almost dead. I could not get on my feet, and the least exertion would make me breathe and vomit. My husband advised me to try Dr. Williams' Pink Pills and for me to stop boxes. Almost from the first I noticed an improvement in my condition, and as I continued taking the pills my blood became better and I began to feel the best of health. I am now able to do all my usual work without feeling the least fatigue; my appetite is better and I sleep more soundly at night. All this I owe to Dr. Williams' Pink Pills, and I unhesitatingly recommend them to all who are run-down in health."

Write for the Dr. Williams' Pink Pills at all drug stores or they can be sent by mail at 50 cents a box by writing the Dr. Williams' Medicine Co., Brockville, Ont.

### Canada Has Exclusive Method

#### Quality Of Canned Goods Must Be Marked On Label

Canada is the only country in the world so far to require the quality of canned goods to be clearly marked on the label so that the housewife can buy with the assurance that she is getting what she wants. Under the provisions of the Meat and Canned Goods Act, administered by the Fruit branch of the Dominion Department of Agriculture, there are four quality grades: "Fancy," "Choice," "Standard," and "Second." Always buy by the quality mark on the label, and now be applied to home buying with a real value.

Perianth is unrivaled for promoting feminine beauty. Tones and rejuvenates the skin. Makes it exquisitely soft-textured. Makes hands lustrous and white. Regularly recommended to soothe and relieve roughness or chafing caused by wet conditions. Indispensable to every daily woman. Cool and refreshing. Delicately fragrant. Magical in results. Never leaves a vestige of stickiness. Perianth is the one ideal requisite for the woman who cares for charm and elegance.

### Canada's Forest Area

The total forest area of Canada is estimated to be 1,151,454 square miles. Of this area, 865,880 square miles are productive and accessible; 284,000 square miles are in the hands of timber of merchantable size; the remainder carries young growth not yet fit for use.

A railroad in Japan provides third class sleeping cars for its poorer citizens.

## Do Your Ears Buzz With Loud Noises?

This is an infallible sign of Catarrh, and if not checked may result in partial deafness. The simplest remedy is CATARRHOLINE - a foaming, soothing vapor a few times daily. It prevents Catarrh from spreading. Head noises, buzzing and ringing, and all other ear troubles are cured by CATARRHOLINE. Nasal discharges are stopped. Bitten, inflamed crusts are healed. Ringing, mucous which drops back from the nose into the stomach is done away with. Headaches depart. The breath is purified. You will be free from colds, coughs, sore throat and catarrh if you use CATARRHOLINE. Two months' treatment \$1.00; small size, 50c. At all dealers.

### Boosting For Canada

#### Many Cities In Britain Have Held "Canada Week"

There has not been much said in Canadian newspapers about the city of Bristol's "Canada Week," and the event should have been taken more notice of than it is.

Bristol is a city of 400,000 people. It has just held "Canada Week," which consisted of a campaign for the buying of goods made in Canada.

Pages of newspaper advertising space were devoted to the display of Canadian merchandise, and other forms of publicity were given to our products. There were thousands of must-haves of the selling of many thousands of dollars worth of goods, and the value of introduction of lines of Canadian goods to British purchasers for the first time.

Chicago, with a population of over a million, and several other big cities have held "Canada Weeks," and Canada must have derived a large amount of permanent benefit from them.

Such gestures of good-will deserve the greatest appreciation in Canada. There is a great deal more boosting of Dominion products in Great Britain than there is in English provinces. The latter have been holding "Canada Weeks" about \$50,000 on the promotion of the sale of goods made in the British Isles. We sell a vast quantity of merchandise over there, and then spend most of our money in buying United States goods.

Canada will wait till the moon turns into cheese before a "Canada Week" is staged in one of the big cities over the border.

Miller's Worm Powder does not need the after-buzz of castor oil or any purgative to complete their thoroughness, because they are thorough in themselves. One dose of them, and they will be found multiplying in children, will end the worm trouble by making the stomach and bowels untenable to the parasites. And not only this, but the powder is certain to exert most beneficial influences in the digestive organs.

### Has No Known Parallel

#### Two British Families Have Produced Outstanding Men For Generations

The death of the Earl of Balfour recalls the fact that for centuries two British families have produced big men for generation after generation—the Cecil and the Churchill. There is no known parallel for this in any other land or in any other age.

The Pitts, father and son, were premiers of Great Britain, but it ended there, and of practically all other men of note in the old land the descendants have not attained any other honor save that of carrying a big name.

It is true that the mother transmits mentality, then the Cecil and Churchill men must have an uncanny habit of selecting unusual wives.

### Established a Record

Thirty-two years on a water wagon is a record of civic service which will last some heating, and when there is added to that a service of over 20 years, as driver of the town's fire team, during which he missed only one fire, and the record of "Tosser of Port Hope, Ont., seems to be complete.

### Chicken Cannery

The construction of a \$25,000 chicken cannery to be operated in connection with the R.S. Egg Pool and with other poultry raising concerns of the Fraser Valley, is planned for New Westminster. It will be a private venture.

One of the most thrilling drives in the mountains of Western Canada is along the new motor road to the top of Mount Revelstoke, in Mount Revelstoke National Park, a reservation of 100 square miles in British Columbia.

The polar bear has hair on the soles of its feet, which helps it to avoid skidding on the ice.

Minard's Checks Falling Hair.

### Millions Dedicated To Humanity's Service

#### Hope Sun Set Aside By Mayo Bros. For Medical Education and Research

The millions of dollars that Doctors William and Charles Mayo have made through their world-famous clinic at Rochester, Minn., will not go to their families when the two great surgeons die.

Instead this money — the "holly money," as the brothers call it, now totaling in the neighborhood of \$13,000,000 — will be dedicated to humanity's service through the Mayo Foundation for Medical Education and Research, affiliated with the University of Minnesota.

Meanwhile the two brothers have put themselves on "salaries" which do not amount annually to nearly half of their incomes. All of their income above these salaries goes to the foundation, to train surgeons for the future.

Dr. William Mayo was asked on brother and I discussed long to do said. "When money began to come in and pile up so fast it frightened us, we had to meet that problem. The thought of reducing our generosity had to be dismissed. We could not pass up our own profession. There are thousands of physicians and surgeons who need the income from what are becoming accepted as standard fees.

But we could do something that we did. We scaled the fee in accordance with the patient's means. And we gave the same treatment to the man without a cent that we give to the millionaire. A man's financial standing has nothing to do with the treatment he gets from us. But it has everything to do with what we charge him.

### Curious Twist Of History

Anyone with an eye for the curious twists of history must be interested in the fact that Primo De Rivera, ex-dictator of Spain, was kept alive for many years past by himself, developed in the New World, which was discovered by a man named by the Spanish Court nearly four and a half centuries ago.

It is estimated that there are 200,000 drug addicts in the United States.

The star-hair has no nose, but the whole of its underside is endowed with the sense of smell.

## W HAT Unexpected Splendours In This Curious Tourist Third Cabin Dining-Room, typical of the accommodation of the more popular class. Intimate little tables, laden with flowers; spotless napery; and a menu of endless variety and astonishing generosity! Tourist Third Cabin rated, adjusted. Cabin class rates revised. ### Planning Big Air Field

#### Winnipeg May Have Combination of Air and Sea Plans

Plans now being formulated by a special committee of the Industrial Development Board of Manitoba aim to provide Winnipeg with one of the most unique and best equipped combination land and sea plane airports on the continent. The plans, which have been approved by the Department of Aviation at Ottawa, include an air field 800 acres in extent with an artificial lake about two miles in diameter.

Don't be without Douglas' Egyptian Liniment. Keep it always handy. Relieves rheumatism, sprains, sore throat, quinsy, and cures irascible or burn noses, Barber's Itch and Ringworm.

A plane carrying twenty passengers has set a record by flying from Paris to London in 95 minutes.

More than 2,000 women are studying medicine in German universities.

## Be Certain of SAFETY

### Build with Gyproc

#### FIRE can hurt your home to destruction unless a fire-resistant material such as the new Ivory colored Gyproc Wallboard is used in its construction.

Inexpensive, permanent, easy to apply, Gyproc Wallboard does not burn. It is exactly what you want for fire-safe walls, ceilings and partitions when you build, remodel or repair.

Ask your dealer today for full information on Gyproc Wallboard or send for interesting free booklet "Building and Remodelling with Gyproc."

## Major Developments In Canada's Air Mail Service Attracting Great Attention

Canada, with her vast area and widely scattered population, is advantageously situated to derive the greatest benefits from the development of internal air mail service. The great distances which separate the principal urban centres and the steady and broad-fronted advance in settlement and development serve to render postal communication by air peculiarly valuable in the Dominion. In addition, the Post Office Department of Canada has entered into a reciprocal arrangement with the United States postal authorities whereby Canada may take full advantage of the extensive United States air mail services connecting with points in Mexico, the West Indies, and Central and South America.

The establishment of Canada's official air post services is of comparatively recent date, but the conveyance of mail matter by air within Canada has been an actual fact for over ten years. In the early days of mail transportation by air, the Post Office Department, as a temporary measure, gave the day of the operating aviation companies to carry letters, entirely at the senders' expense, subject to a maximum of five cents to twenty-five cents per letter, in addition to the regular postage. This fee was retained by the operating companies. The successful operation of numerous "airlines" services demonstrated beyond question the practical feasibility of air mail transport in the Dominion, for these services were conducted in many cases under considerable operating difficulties although not on hard-and-fast schedules.

Civil aviation in Canada assumed importance in 1927 which justified the Post Office Department in utilizing the facilities available for the fast transport of mails, not only to remote areas but between the larger centres of population. Service of the latter type had of course to be arranged on definite time schedules and this involved a much greater problem. As a beginning a service was inaugurated by which incoming British mails were taken from trans-Atlantic steamers and transported by air to Montreal, thus considerably hastening their delivery. Later, on October 1, 1928, a service of daily frequency was established between Montreal and Toronto, and on the same day an international air mail route was opened between Montreal, P.Q., and Albany, N.Y. On July 15, 1929, the Montreal-Toronto route was extended to Detroit, via Hamilton, London, and Windsor, Ontario, and then a point of contact with the United States air mail routes westward was established, in addition to providing the most densely populated portion of Ontario with speedy air mail service. On the same date a still further connection with northern air mail routes was provided by the establishment of daily service between Toronto and Buffalo, without interruption of the operation in the Maritime Provinces—scarcely of suitable landing fields, densely wooded areas, broken country, and long the Postmaster-General inaugurated a service early in December, 1929, between Montreal, Quebec, Moncton, and Saint John.

The next major development in Canadian Air Mail Service was the inauguration of the trans-prairie route on March 3, 1930. Planes are now operating daily between Winnipeg, Regina, Moose Jaw, Medicine Hat, and Calgary, and between Regina, Saskatoon, North Battleford, and Edmonton on a schedule which clips a full twenty-four hours off the transcontinental movement of Canadian mails. This not only constitutes a marked advance towards the coast-to-coast service which is being developed link by link, but revolutionizes intercommunication between the provinces of Alberta, Saskatchewan, and Manitoba.

It is in the outlying portions of the country, however, that the most valuable use of Canada's Air Mail Service has been carried out. Until recently the remote settlements along the north shore of the St. Lawrence River, on Anticosti and the Magdalen Islands in the Gulf of St. Lawrence, and along the sub-arctic reaches of the Mackenzie River, have been almost cut off from the outside world during the winter months. Communication was necessarily by dog team and other primitive methods until the recent dramatic change to swift aeroplanes reduced the duration of mail trips from weeks to hours.

The establishment of contract air mail service in the Mackenzie River District—the most northerly of all air mail services—in December, 1929, attracted worldwide attention. The route from McMurtry, down the Athabasca River, along the south shore of Great Slave Lake, and down the mighty Mackenzie River is over 1,000 miles long. Hitherto, in winter months, dog teams had been the sole means of conveyance and the volume of mail was correspondingly small being limited to letters and a few newspapers. The total amount for Akavik in the winter of 1928-29 was less than two hundred pounds. Contrary to the popular notion, the conditions obtaining on the advent of air mail facilities. Ten thousand dollars' worth of mail were carried on the first flight—over a thousand pounds alone for Akavik at the mouth of the Mackenzie. The chief remaining routes are those which penetrate the rich mining areas of Ontario and Manitoba, i.e., Red Lake, Kenora, and Winnipeg. They are the principal mineral areas served by air mail in Canada.

The development of flying fields and provision of lighting facilities, not to mention the constant improvements in aircraft which are expected during the next few years, will undoubtedly do much to facilitate the performance of regular scheduled air mail service within Canada. Meanwhile the efficiency percentages maintained by the different operating routes are remarkably high. In addition to holding the world's record for speed over contract air mail lines, the Canadian service proudly boasts that it has never lost a single piece of mail out of the hundreds of tons that have been entrusted to it.

W. N. E. 1830

### Still In Experimental Stage

Difficulties Have Crept Up In Connection With Battery Brooders

A recent report of the Dominion Experimental Farm would indicate that another much heralded innovation in the poultry industry is not destined to any great success. During the past two or three years, the battery system of brooding chickens has gained some prominence in Canada, the principle being that of raising chickens in a uniformity and correctly heated room in total batteries. These batteries are simply cages placed one on top of the other with a wire floor and water troughs, which are placed outside. Beneath the wire floor are papers to catch the droppings and which are easily removed and burned.

The advantages of such a system are quite obvious. It is really a factory of mass production of chickens. One man can look after a large number of the babies and the wire floors are a complete sanitation. Temperature and fire risks are eliminated, spread of disease is minimized, and the feed and water troughs, which are placed outside the wire walls of the compartment, are easily kept clean.

But some difficulties have crept up and it would seem from the report that they are serious ones. In the first place, a temperature of the suits day-old chicks, is too high for the older broilers. Some consideration has been developed from the chicks getting caught in the wire floors as might be supposed, and last, but not least, it was found that from four to six weeks in the oldest that chicks can be handled in this manner. Crambling and nervousness then develops in the chicks, and the mortality becomes high.

The report concludes that the battery system is still in the experimental stage and that at present will find its greatest use under hatchery conditions for the short time brooding of chicks.

**Willing To Take Chance**  
Norman Davidson, who swam the English Channel in 1928, has written to Knute Johnsson, a young Scandinavian, who proposes to cross the Atlantic in a speed boat, offering him his services as a companion, for whom Johnsson has been advertising.

**Will—An empty chamber bottle**  
Miss—Our fathers arrive promptly tonight.  
Will—What do you mean?  
Miss—It's lost its top.

It costs from \$1,600 to \$2,000 per mile to sand a road.

### FIRST AID SCHOOL ON WHEELS

The superiority of slugs from mature over immature corn is clearly demonstrated by tests conducted at the Dominion Experimental Farm, at Brandon, Manitoba. In a series of tests in which a group of six coves were fed alternately, mature and immature corn slugs, a marked increase in the volume of milk produced, and in respect to gain in body weight, was shown by the group fed mature corn slugs. The relative feed values showed the laboratory tests are—for mature corn 69.1 per cent. moisture content, 2.77 per cent. protein, 61 per cent. fat, 16.63 carbohydrates, 9.27 fibre, and 1.62 per cent. ash; for immature corn the moisture content was 12.0 per cent. protein 1.71 per cent. fat 51 per cent. carbohydrates 7.74, fibre 5.45, and ash 1.50 per cent.

**Must Use Percentage Of Domestic Flour**

Legislation Is In Force In Five European Countries

State legislation requiring millers to use a certain percentage of domestic flour is in force in Germany, France, Spain, Switzerland and Portugal, states John U. G. Elliott, secretary of the overseas trade department, in a written answer to a question in connection with the proposal that the British war should contain a statutory proportion of British-grown wheat flour.

The minimum in France is as high as 97 per cent. It is declared. In Spain the minimum is 5 per cent. No percentage is fixed in Switzerland and Portugal, but millers in those countries must take delivery of a certain quantity of native wheat.

**Under Soviet Rule**

It's not all "cakes and ale" in Bolshevik Russia, according to Zachary Brunsback, who has just received a palatable letter from his brother in Christ, Siberia. The brother wrote that the government had approached his wheat crop, bedding and furniture, leaving only 20 bushels of wheat for his family's use.

### Colorado Interested In

Farmers Of Peetz District Plan To Enter Exhibit

According to the Peetz Gazette, a weekly newspaper published at the town of Peetz, Colorado, the farmers of that district are determined to demonstrate their ability to grow the best quality grain, state S. J. Letta, public agent for the World Grain Exhibition and Conference, to be held in Regina in 1932. They are already preparing to be represented in a number of selected cases at the World's Grain Show in 1932.

In an interesting article on this great undertaking The Gazette says: "Initiative plans are now being considered for the entrance of Peetz grown wheat, rye, barley, sweet clover, and hog millet seed and beans in the competition for the thousands of dollars in prizes offered at the World's Grain Exhibition and Conference, to be held at Regina, Saskatchewan, Canada, July 25 to August 6, 1932."

"People of Peetz feel this big show and the local Community Fair Association has already commenced to plan the details of gathering samples that will be displayed against all world records."

In 25 years—from 1900 to 1925—the reindeer population of Alaska increased from 3,000 to 400,000.

Nearly 4,000 Christmas puddings were shipped from England to the United States last year.

## Canadian National Parks, With Wonderful Scenic Beauty, Form a Great National Asset

The coming season promises to be one of great tourist activity so far as the national parks of Canada are concerned. Officials, both of the Department of the Interior and of the railways, report an unusually large number of requests for information and advance bookings. Large numbers of inquiries have also been received in the department from motorists in practically every section of Canada and the United States, and even from Mexico. The majority of these ask for the shortest routing to Canada's national parks, a description of the different attractions, the accommodations and particularly the facilities for camping.

A comparative analysis of the various applications shows that by all odds the strongest appeal of the parks is their scenic beauty and wilderness quality. An extract from one expresses the demand of many: "I want to visit the parks containing the prettiest mountain scenery, as I want to camp out in the wilderness, fish and go mountain climbing." Some of them reveal the fact that the writers know almost nothing of Canadian geography. They have heard a rumour of the greatness of the national parks of Canada and they want to ask where they are and how they can get to them. Apparently it has come to be accepted in the minds of the travelling public the continent over that national parks represent the finest examples of magnitude, power, and beauty in natural scenery.

This, in the final analysis, is perhaps the strongest appeal of the national parks. They supply something which answers to a universal craving, a hunger innate apparently in every human being and which must become more deeply felt as population increases and conditions of life in this continent grow more artificial and restricted. Already, the world over, there is a recognition that our present mechanical development may sweep original conditions everywhere away. That is, perhaps, one reason why the recent announcement of Hon. Charles Stewart, Minister of the Interior, that he hoped the Rockies would soon come where there would be a national park in every province, has not met with unqualified approval.

The more far-sighted of our people realize that the changes which will probably come about in Canada during the next hundred years will be enormous. While Canada is already leading the world in the reservation of areas for national parks, it is recognized that the needs of the future are sure to be great and that the preservation of the national beauty is now, while the land is still unoccupied and primitive conditions are still intact, a task still more urgent.

Visitors to the national parks last year reached over half a million people in all, and, larger, larger, larger, only in its infancy. The creation of new parks such as the Riding Mountain park recently set aside in Manitoba, the extension and improvements of federal and provincial motor highways now under way will provide new stimuli for travel and, incidentally, bring in new wealth to the Dominion. Expenditure of visitors to the parks range from a few dollars a day to as high as \$100 per day.

One visitor to the Canadian West last year reported that in addition to hotel and transportation expenses his party of four had spent \$8,000 during a three weeks visit most of it with retail firms. Every new park created becomes an addition to our capital stock and increases our power of attracting tourists. It helps swell the prosperity of the railway and steamship companies, hotels, resorts, restaurants and wholesale merchants, and in fact spreads out so as to affect every trade and industry. The more national parks there are, stand for such a high degree of excellence that once an area is set aside as a park, travel tends to flow to it in ever-increasing volume. Both in the returns they can give in health and happiness and in actual economic results the national parks must become an increasing national asset.

**New Method For Making Shoes**

Factory methods used in mass production of automobiles are being introduced into the shoe factory of Erfurt, Germany. The shoe is fabricated as it is transported on trays through the factory. The inventor claims the method will reduce costs and increase production.

Submarine cables of the world now have a total of 300,000 miles.

"You look prosperous. What work do you do?"  
"I make worm holes in antiques furniture."—Karikaturen, Oslo.

**How To Order Patterns**  
Address—Winnipeg Newspaper Union, 315 McDermott Ave., Winnipeg

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

Today's model is very slimming with its V's and tiny front dip, is lovely in cut for the normal and heavy figure. It can be belted at the natural waistline, or just below, as so many women prefer. A low fitting, the slender neckline, and others are attached to the wrists.

Maroon, dark blue, olive, and navy are lovely tints for this model. Navy promises to be a popular spring color, but light bluish green, violet, red greys, and beige are also popular.

## Here and There

(1224)

The new hotel in course of construction on the Lac Pontchartré Hotel & Railway at Montville N.B. will be completed this fall and is expected to open shortly before Christmas. It will replace the present "Crest" hotel, which is a small building, but will have 100 bedrooms, hallways and assembly hall, bar, dining room, billiard room, billiard room, card room and other offices, and will be a notable addition to the list of new and up-to-date hotels in the Maritimes.

No widespread or general depression exists in Canada, though several factors, notably the failure to market our grain and the loss in buying power resulting therefrom, have contributed to a slowing-up of traffic. Declared E. W. Beatty, chairman and president of the Canadian Pacific Railway, addressing the shareholders of the company at the 4th annual meeting held early in May. He added that there was nothing of a fundamental character which should prevent the return of normal business conditions within the next few months. Mr. Beatty said, "We have all been hopeful that the first and perhaps most essential change, both because of its psychological as well as its commercial effect, namely, the free movement of grain out of the country, would be in evidence during this or next month."

At the annual meeting of the Canadian Pacific Railway Company held early this month dividends of 2 1/2 percent, in common stock for quarter ending March 31 last, was declared from railway revenues and special income, payable June 30 next to shareholders of record May 29. It is McLaughlin, of Ottawa, president of General Motors of Canada, Limited, was elected to the board of directors.

Canada's new championship 18-hole golf course, the Royal York Toronto, is scheduled to be opened officially May 15, when it is expected there will be a distinguished gathering of golfing notables present together with E. W. Beatty, chairman and president of the Canadian Pacific Railway, the organization responsible for the creation of the course. It has a length of 2,410 yds., 2,410 yards from the championship tee and a par of 36-37-72.

A bright Atlantic silver salmon, weighing 24 lbs., was taken by the Cain's River, April 28 last, by David Hayne, vice-president of the General Electric Company, Bridgeport, Conn. It is regarded as the record spring run salmon ever taken by any angler in New Brunswick. The party with Mr. Hayne landed 412 salmon, all of which, except some eaten, were returned to the water. "I never saw such good fishing," he said.

At the Calgary Bull sale held recently, the largest sale in North America at which bulls are sold singly, 61 bulls realized \$112,475, an average of \$2,337 each. Hereford was the sensation of the sale, 218 head bringing \$46,295, or an average of \$214.56 per bull.

"Lady Victorine", harred Plymouth Rock which last year held 324 eggs in 324 days, a record. In this year holding strongly to maintain her position, having laid 168 eggs up to April 15, and keeping to her average since that date.

Canadian Pacific Railway Privy night broadcasts are now being sent out across the Dominion from coast to coast. Letters are being received from all parts of Canada in appreciation of the program and of the radio reception in all centers. Arrangements have been made with the National Broadcasting Company of the United States to place special P. R. programs on the air every night in April, over WJZ in Chicago, populated sections of the Eastern United States.

Veteran of 65 years railway service and one of Canada's earliest telegraph operators, William Philip Martin, formerly assistant superintendent of the Canadian Pacific Railway, died in Vancouver recently. He lectured telegraphing from his father, when a boy and became a chief dispatcher at the age of 18.

Discovery of a new species of whitefish in Clear Lake, Manitoba, is announced by A. B. Shaw of Manitoba University. The new species has been named *Coregonus Ojibwayensis*, in honor of Dr. C. E. D. Ojibway, formerly of the faculty of Manitoba University. The newly discovered fish is common in Clear Lake. It lives at a great depth during the summer, coming to the surface only in the spawning season.

# Are Your Children ? PROTECTED ?

During the Year 1928

DIPHTHERIA Was Responsible for 50 Deaths

AND

TYPHOID FEVER was responsible for 28 Deaths

OF ALBERTA CITIZENS

94% of the deaths from DIPHTHERIA occurred among children under 15 years of age.

There need not be a Single Death in the Province From Diphtheria, Typhoid Fever nor Small Pox

Science has placed in our hands the means of wiping these preventable diseases out of existence.

The vaccines required for this purpose are furnished FREE OF CHARGE to all physicians and local Boards of Health in the Province by the Provincial Department of Health.

It is the duty of local Boards of Health to prevent epidemics starting, and the most effective method of doing this is to

Protect the Children of Our Province From These Preventable, Death-Dealing Diseases

What has been done for the protection of the Children of YOUR community?

Is YOUR community safe for your children?

The Provincial Department of Health issues Bulletins and pamphlets giving information and advice on how to secure a large measure of health and how to safeguard life in your community. Copies of these publications may be obtained on application to the Department.
